(54) Title: ELECTROLUMINESCENT DISPLAY, ELECTRONIC DEVICE COMPRISING SUCH A DISPLAY AND METHOD OF MANUFACTURING AN ELECTROLUMINESCENT DISPLAY

(57) Abstract: The invention relates to an electroluminescent display comprising at least one display pixel, the display pixel comprising at least a substrate, a first electrode deposited on or across the substrate, an electroluminescent layer, and a second electrode. The display pixel further comprises at least one insulating structure within the display pixel adapted to enhance the light output from said display pixel. The light output enhancing structure can be used to generate images with different brightness levels.
